

ActiveCare Introduces Elevating Leg Rests for Its Power Wheelchairs

COLUMBIA, SC, March 20, 2008 – ActiveCare Medical today announced the availability of Elevating Leg Rests (ELRs) for all of the company's power wheelchairs.

ELRs allow power wheelchair operators to travel comfortably with their legs raised—a necessity for those with some medical conditions, such as edema.

The company's ELRs feature adjustable levels of elevation and calf pads for added comfort. The ELRs are lightweight and easy to attach to ActiveCare's power wheelchairs.

ActiveCare's ELRs can be affixed directly to the company's Spirit™ foldable power wheelchair. ELR's can also be used with the Medalist™ power wheelchair; the Renegade™ power wheelchair; and the company's new mid-wheel drive wheelchair, the Catalina™. The Medalist, Renegade and Catalina require an additional ELR bracket.

ELRs and ELR brackets are sold separately. Both are available now and ready to ship from ActiveCare's warehouses in Fort Mill, SC, and Brea, CA.

ActiveCare Medical Inc., headquartered in Columbia, SC is a leading global manufacturer of high quality wheelchairs, scooters and ambulatory aids. To obtain more information about ActiveCare Medical™ products, go to www.activecaremed.com or call 866-621-4933.
